Dedication

MR. DAVID H. WILSON

Mr. Wilson has served at Ovid Central School for many years as teacher to both the present students and to many previous classes. Now, as our math teacher, he serves many. He spends time in class to make sure that every student has an understanding of the subject. He also gives of his own free time to give assistance to those students who need extra help. Also, for many years, he has been advisor to our chapter of the National Honor Society. This year, he is giving more of his own time and effort by starting a math club. In these capacities as teacher and advisor, he has always been friendly and understanding to everyone.

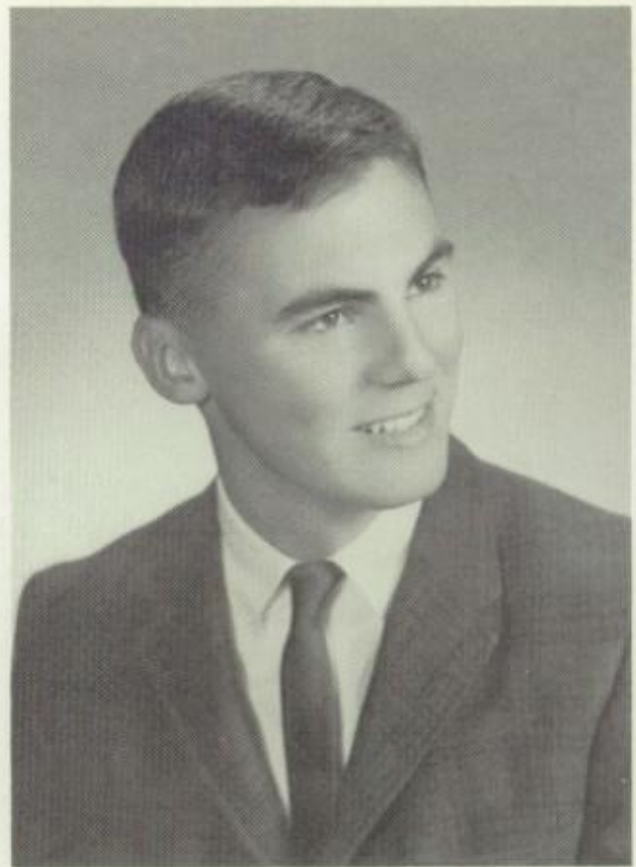

To you, Mr. Wilson, for these and many other qualities, we, the staff of the 1965 Ovidian, dedicate this book as an expression of thanks.

Look at that form!

Duh, what's up Doc. ?

They never would have known they were support stockings unless . . .

Teri, I'd like to tell you the facts of life.

Is this what you've been looking for?

Our Exchange Student

I am the oldest of my family; we are five children, besides my mother and father. We live in a big house in Bogota, the capital of Columbia. We have a few different customs. One is that I never before have to do anything in my house because we have three maids, and they do the dishes, clean, do our beds etc. We really don't have any opportunity to do things like this--and if I tell the truth, I would not like my house there if I had to clean it, because it is so big.

My father is the principal of "A.S.L." Laboratory; he is a veterinarian and has some people who go to different places and tell him what happened with the animals. My mother is the first woman on the board of the Bogota Stock Exchange. My sister is now in Cohoctan, New York under the International Fellowship Exchange Program.

The day I leave my country I was so scared because I didn't know if I would like the families, and they would like me. I was alone in one big country, with different customs, and I didn't know anybody. But in a few days what a difference! I feel like in my own house because everyone has been so nice to me. My first three months I live with the Foxx's. They were the best persons with me and they helped me so much in my first days, and always when I need it and I am really very thankful to them. I never could forget all they did for me and I am very grateful and consider myself very lucky for having this family, this wonderful family that I can call "my family".

The 15 of December I moved to Burdin's, and they are so nice with me too. There I started my cooking lessons and I think now I know more about it, because before the only thing I know how to do was instant coffee. Well, I live with them until March, and I am really happy. They are a lot of fun and they help me so much in everything. I feel so thankful to them because they understand me so well, and I know each day with them is something I can never forget because it is my daily life with one of my American families.

Now I can only say that here I have learned so many things not only in language but in many other ways. I consider myself so lucky to come here and through all of you see how wonderful and nice is everybody in the United States. I found here my second house and I never can forget all of you and the wonderful time I have here.

And I am sure that if some day I have the opportunity to come to the United States, for me the best place is come here and see all of you again, because all of you have a special meaning for me. And I know I have to leave someday, but I hope you remember me. I will feel in the same way that my feelings were when I left my own country, because I feel I leave there all my family, friends and the people who mean something to me. But now I can only say thanks to all of you for all the help you have given me.

I spent ten weeks in Quito, the capital of "La Republica del Ecuador". It is perhaps in appearance the most colonial of all South American cities, possessing an architectural wealth of churches, convents and monasteries. One is constantly aware of a striking contrast between medieval and modern in Quito. I lived in another world of old Spanish elegance and charm.

I attended classes at Centro Norte-Americano for six weeks, studying Spanish grammar and conversation and Ecuadorian history, geography, economics and culture. I also traveled through this country of fantastic geographical contrasts. Everywhere, I was met by the very warm and gracious Latin American spirit.

I believe this type of people to people exchange is very basic and beneficial to concordant foreign relations and I extend my deepest gratitude to the community for making it possible.

We Sent These Girls Away - But They Came Back

Judith Burdin

Nicaragua is a very interesting country to visit. It is a world entirely different from ours economically, politically, and socially. It is like a second home to me since I have lived there. America also seems a lot greater to me since I have been away.

Attending Empire Girls State this summer as Ovid's representative has been an experience which I shall never forget. During my week there, I had an opportunity to learn about our city, county, and state governments through lectures, speeches, and participation in a mythical fifty-first state. Each girl held an office, either by election or appointment; mine was that of county supervisor. We were divided into two parties, Nationalists and Federalists, but there was a strong feeling of unity among us. What impressed me most about Girls State was the friendliness of everyone I met there. The girls were some of the most wonderful and most interesting I have ever met. I wish that every girl could have the chance which I had, and I am sincerely grateful to everyone who made it possible for me to go.

Boy's and Girl's State

Being able to attend Boy's State is one of the greatest opportunities that a high school boy can look forward to. I am thoroughly grateful for being allowed to attend the 1964 American Legion's Boy's State, and I would like to take this opportunity to thank all of those people who made it possible for me to attend.

The main purpose of Boy's State is to make the participants aware of the government on the various levels in this state. Throughout my entire week of Boy's State we set up city, county, and state governments. So as to clarify to many of you who may not realize how Boy's State is set up, I will give you the general breakdown of the entire state. Each boy was assigned to a city. One city was constituted by one floor of a dormitory. Next, all three floors of a dorm made up a county. All of the dorms therefore, constituted the entire Boy's State.

In order for us to have elections and conventions to elect nominees for State jobs, we had to have parties. The two parties of Boy's State are the Nationalists and the Federalists. My Party was the Nationalists and we were the dominating party of the Boy's State week. The Nationalists captured almost all of the State jobs, and also the majority of county and city government jobs. During my week at Boy's State, I was fortunate enough to be elected City Treasurer of the City of Clancy, and later in the week, the county Superintendent of Highways. During my short period of duty as the City Treasurer, I printed up money for use in the City of Clancy and also made up the salaries that were to be paid each city official.

I certainly enjoyed my week at Boy's State, which was held on the Colgate University campus, and would like to say thank you once again.
